Full-Stack Web Developer

Highly driven and collaborative multi full-stack web developer able to build web apps through the entire process. Experienced in information gathering, development, testing, and deployment. Strong aptitude for picking up new computer languages quickly with previous background in business sales and marketing in Shanghai, China and native fluency in Mandarin Chinese.

Technical Toolbox

Front-End Development: HTML5, CSS3, JQuery, Ajax, HTTP Request/Response
Languages: JavaScript, Python, C#, Java
Frameworks: AngularJS, Express.js, Django, ASP.NET Core, Spring, Twitter Bootstrap
Databases: SQL & NoSQL - MySQL, SQLite, MongoDB
Version Control: Git, Github
Servers: Apache, Node.js
Methodology: OOP, MVC, Restful Architecture, Agile, Scrum
Deployments: Amazon Web Services (AWS), Azure

Web Development Experience

Coding Dojo | Bellevue, Washington (03/2017 - 08/2017)

Completed an intensive 4 stack web development program starting in March 2017 working more than 1500 hours. Achieved belts in two languages and developed a web app used by Coding Dojo.

Projects:

Snacking Dojo (MEAN) - A team of three created a snacking web app that lets students to find, vote, and comments for their favorite snacks on a weekly basis. The administrator can view the top 10 items and be redirected to Instacart to make a purchases for those unique products. The administrator can also reset the votes as a new cohort arrives and has different snacking preferences.
Technologies used include AngularJS, Express, Mongoose, MongoDB, HTML5, and CSS3.

Wedding Planner (C#) - I created a web app that allows registered users to plan a wedding. Visitors can RSVP to weddings and view attendee lists.
Technologies used include ASP.NET Core, Entity Framework.

Ring Game (Java) - I created a ring game web app that has both users and admin, where an admin has privileged access to create teams, add users to a team, and update the user's name. The users are able to choose their favorite magic rings created by the admin and view the group they have been placed.
Technologies used include Java, Spring, MySQL.

Other Professional Experience

James H Osborne | Mercer Island, Washington (01/17 - 08/17)
